

Andy Hoang

Product Designer (UI/UX Desinger)

Work experience

Son Thanh Holdings, Product Design Specialist

I am responsible for designing the company's websites, improving the design process and digital transformation design to support the import and export processes of goods through the border gate.

- Redesign and update the web application for managing bills of lading, vehicle dispatch, and loading and unloading goods.
- Prepare more than 200 page layouts and customize them for development.
- Accelerate the design and development process by creating a unified design system.
- Provide technical support, make design adjustments and UX improvements as well as fix bugs.

June, 2023 - present

VNEXT Software, UI/UX Design & Front-end Developer

I am responsible for designing outsourced products, coordinating with BA, PM, DEV, BrSE, Comtor to complete projects, mainly products of partners in Japan.

In addition, I am also responsible for designing the company's website, as well as participating in some projects as a Front-end developer to support the acceleration of project progress.

March, 2021 - June, 2023

Graphic Design, Freelancer Designer

During this time, I was a graphic designer, a custom designer. My products at that time were mainly media publications and POD products such as t-shirts, blankets and pillows.

About me

I create design as a system of interrelationships, taking into account user needs, business objectives and design features.
